Mr. William J. Casey
Director
Central Intelligence Agency
Washington, DC 20505

Dear Mr. Casey:

Interface Data Systems is interested in doing business with the Central Intelligence Agency.

We currently have three major lines of business. They are:

- 1) Computer hardware sales;
- 2) Sales of broadcast quality video equipment configured into the systems for broadcast facilities, and editing.
- 3) Development of custom software for machine control and data processing.

Our company is located in Anaheim, California and we have been in business as a corporation since September 1978. The President and principal owner of the firm, Donald R. Bauer, has in the past received security clearances from the government ranging to "top secret".

We are presently discussing the development of a Data Retrieval and Storage System utilizing conversion of analog signals to digital signals to be stored on conventional computer mass storage devices.

We are be interested in being included in the CIA's bidding list for any and all contracts involving computer or video technology.

We are affiliated with Digital Equipment Corporation as a Commercial OEM and dealer of their new Personal Computer line. We are also a dealer for the Grass Valley Group (switching devices), Thomson CSF (television cameras), Panasonic Industrial, Sony Industrial and others.

Thank you very much for your time and we look forward to hearing from you in the near future.
